MOBILE COMMERCIAL VMS

Designed and manufactured by OPTRAFFIC, the Full Colour Commercial VMS (FC-VMS) is a portable video display trailer that can be towed easily and displaying any range of text message, pictures and videos.

OPTRAFFIC FC-VMS is an ideal tool for outdoor mobile advertising as you can advertise your sales, store opening, festivals, special events, promotional campaigns, public service campaign, and also rather suitable for your rental business.

The VMS are manufactured in our ISO9001 facility with innovative technology. The unique hardware and software features of our VMS allow you to program your device remotely via 3G connected computers, wirelessly via APP installed mobile phones, and/or via Ethernet connection based on what control system you choose for your commercial VMS trailers

You may choose any preferred pitch display from our wide range LED modules.
