### VARIABLE MESSAGE SIGNS

Designed and manufactured by OPTRAFFIC, the Variable Message Sign (VMS) is a fully solar powered device that can display any range of text message, graphics and animations in 5 colors.

OPTRAFFIC VMS is an ideal tool for local traffic management, council & constructional engineering, mining work safety, and also advertising and public notice of upcoming events like international conference expo and sport events.

OPTRAFFIC VMS is designed in our ISO9001 facility with innovative technology. The unique hardware and software features of our VMS allow you to program all your devices anywhere and anytime via 3G connection.

You can find all the device locations, design and create any colorful message with graphic symbols, text or graphics combined, make multiple message screens, flashing animations, and/or detect the vehicle speed with optional radar installed.

### Features:

**Low Consumption** - Continuous Work 24/7 | **Control System** - Web system / PC System / App System | **Multi Language** - English, Arabia, Dutch, Spanish, French, Chinese | **High Transfer Efficiency** - 40% Higher than average | **LED Light** - Long lifetime, High brightness, Low depreciation | **Lifting System** - Safe, stable, reliable | **Mechanical Structure** - Heavy-duty trailer, wind approved | **Safety** - Safety chain locks, vandal protection
